

# VOLCANIC **MINDS**

smart  
fast  
efficient

Volcanic Minds is a **digital experience company**.

Our ultimate goal is to create the best product for our partners.

How do we do that?

- *tailor-made* solutions
- CX / UX / UI design
- *web* and *mobile* applications
- devOps and system integrations
- strategy & CIO / CTO *as a service*

## ENGAGE

shared analysis with in-depth documentation

## MOCKUP

studying the target and prototyping

## MANAGEMENT

team management and performance evaluation

## DEVELOPMENT

infrastructure design and technical development

## SHARING

incremental sharing of the development progress and change request management

## EVOLUTION

deployment, product evolution, generic and release support

## Strategy and design

We help our partners to plan their digital **future**. By beginning this journey side by side with our clients, we can turn the original vision into a winning strategy.

## Digital Factory

We combine passion and determination. With precision and efficiency, our team crafts the technological ecosystems that turn the most ambitious ideas into concrete reality.

## Co-Management

Technical teams require experienced management. The co-management service guarantees the achievement of the result within the deadlines, while maintaining the highest degree of quality.

## Tutoring

We work side by side with the technical team, leading it to a professional growth aimed at addressing the real needs of the project.

It won't just *work*.  
It will **amaze**

Our strengths:

- **mobile-first** approach to the realization of hybrid apps
- **SEO-oriented** development
- attention to **details**, ensuring maximum **efficiency**

More than ten years of experience, with customers in multiple areas:

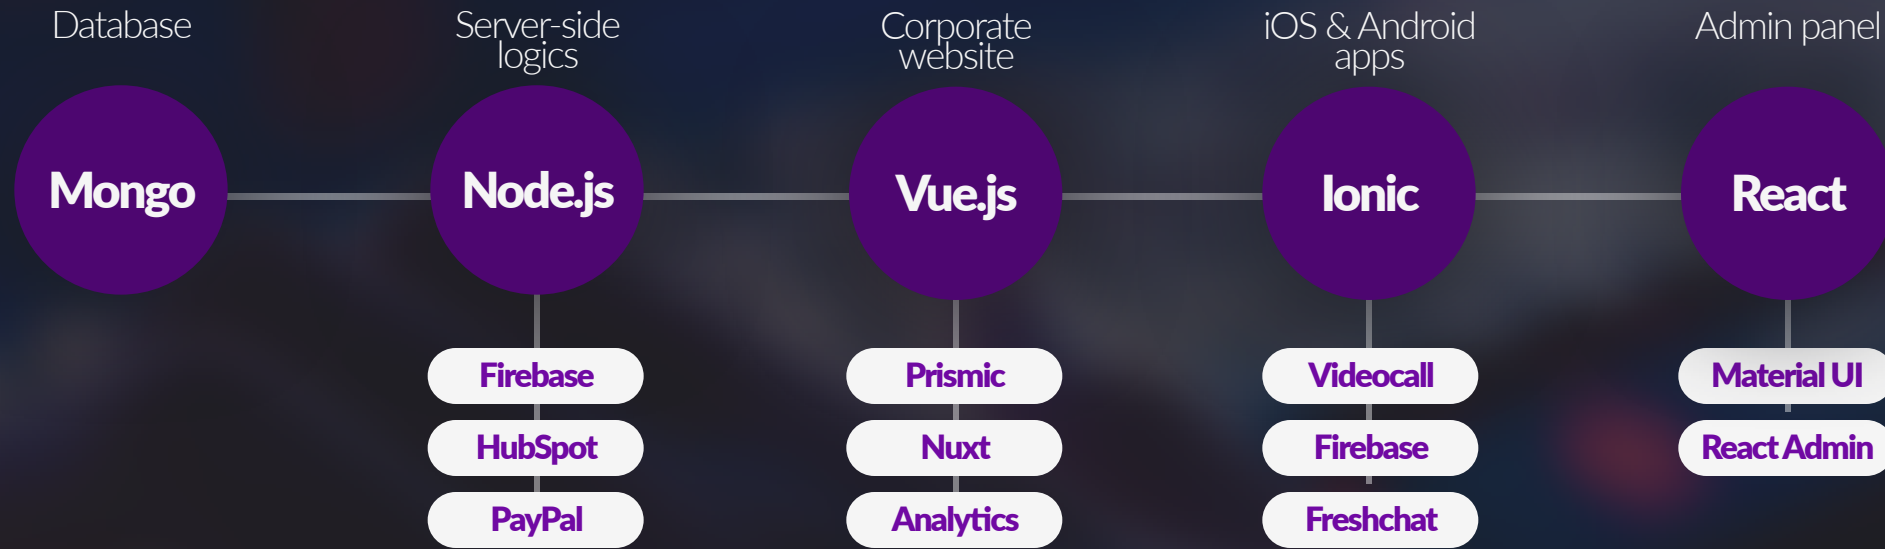

**Banking and Finance**

**Manufacturing**

**Advertising**

**Digital evolution**

**Services for citizens**

The partner ambitious project required the development of an entire system, including the corporate website, the customer's personal area, a dedicated mobile application and an admin panel for the internal staff. In addition, the design of the Customer eXperience interfaces, the APIs and a bespoke database.

We made use of the latest technologies and an automated deployment to the cloud, making the entire architecture **future proof**.

Let's embark together on  
your next digital project!
